Underwriting Reports

An underwriting report is the necessary starting point for a tailor-made industrial insurance.

 Cryzont

Underwriting Reports

We are specialized in survey visits to Industrial sites.

Our inspections include the following works:

- » **Visit to the plant**, with an introductory part to gather main technical information and a comprehensive site tour to find critical points in the process as well as means of protection available.
- » **Evaluation** of the exposures present and respective controls and procedures in lieu of the insurances provided.
- » **Action plans** to improve the risks identified during the visit.
- » **Loss estimates** (MFL and PML scenarios) for Property Damage and Business Interruption.

Who is it for?

| Insurance and reinsurance companies

Benefits

- » Underwriting according to the identified risks.
- » Proper knowledge of loss estimations (PD & BI)
- » **Appropriate insurance limits**
- » **Recommendations** for loss prevention
